(54) MULTI-CAMERA DATA TRANSFER SYSTEM AND DATA TRANSFER SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To enable power-saved serial communication with a simple configuration without requiring a USB interface, for which the control by means of a host computer is required.

SOLUTION: Image data simultaneously or successively provided by plural electronic cameras 2B-NB for storing respectively picked-up image signals are successively read out at a prescribed timing and serially outputted and while the image data stored in the electronic camera are being read out or transmitted, the other electronic camera is turned into standby mode state.
